From Zero to QA Automation Engineer
A clear, structured path designed to take you from theory to hired without the overwhelm.
Learn the Basics
Practice Real Challenges
Build an E2E Framework
Rehearse with AI
Track Jobs and Apply
Engineers Who Made the Jump
Real feedback from QA engineers using the platform to practice harder scenarios, prepare for interviews, and build hiring momentum.
The roadmap and study tracking gave me a path I could actually follow. Within weeks I had structure, better consistency, and enough confidence to apply for stronger roles.
Amit M.
Junior QA to SDET in 2 months
The hands-on Selenium practice and the Bank Demo finally bridged the gap between theory and real-world automation. I used the iFrame and drag-drop exercises before my technical round and felt ready for every question.

Questions? Answered clearly.
Everything important before you start practicing, interviewing, or tracking jobs inside QA Playground.
Is QA Playground really free?
Yes. Practice elements, AI mock interviews, and job tools are free to use — no credit card, no paywall. Create a free account and you keep your progress, mock interview scores, and pick up where you left off.
Which automation frameworks does it support?
Do I need to install anything before using it?
Is it suitable for complete beginners?
Will this help with interviews and job preparation?
How do the AI mock interviews work?
Can it also help me manage job applications?
QA Playground
A purpose-built platform for QA engineers. Learn Selenium, Playwright and Cypress through practice on real UI elements, demo apps, AI-based interviews with AI agents, and track every job application through to the offer.
